

**INNOVATION**

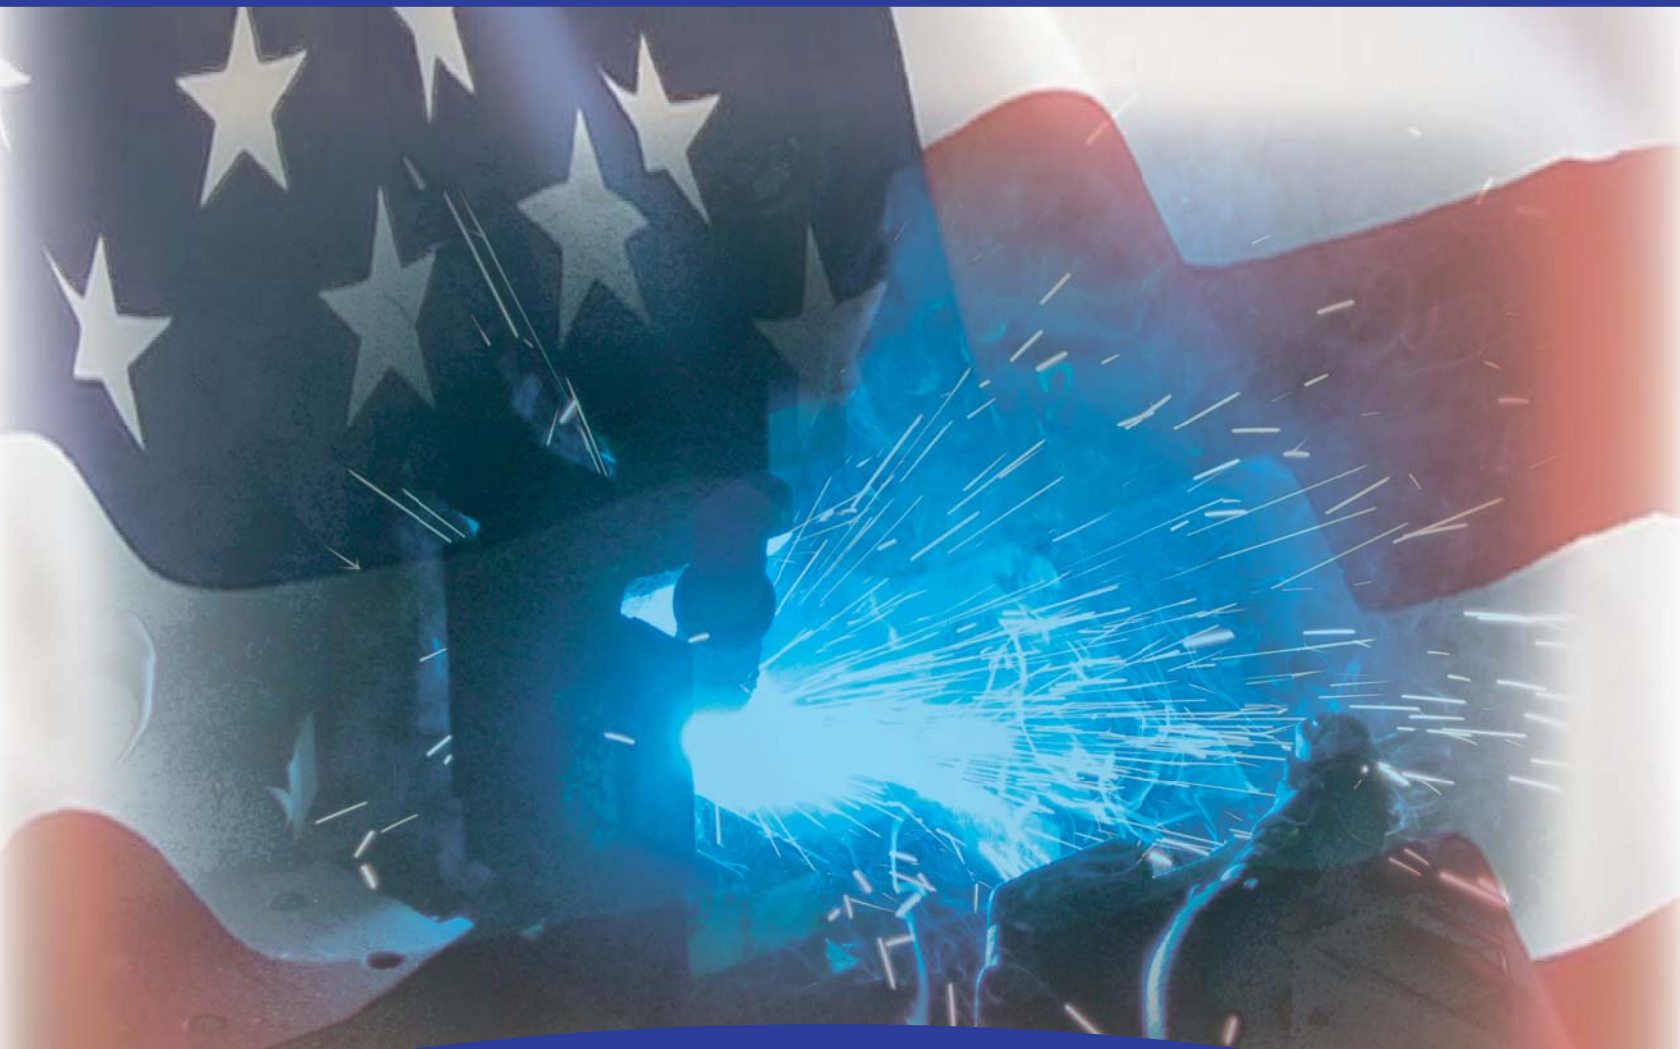

**SOLUTIONS**

# **E & E Manufacturing Company**

**DEFENSE – AUTOMOTIVE – COMMERCIAL – INDUSTRIAL**

**We are committed to become the leader in design and manufacture of structures and frames for wheeled vehicles in the military, commercial and industrial markets.**

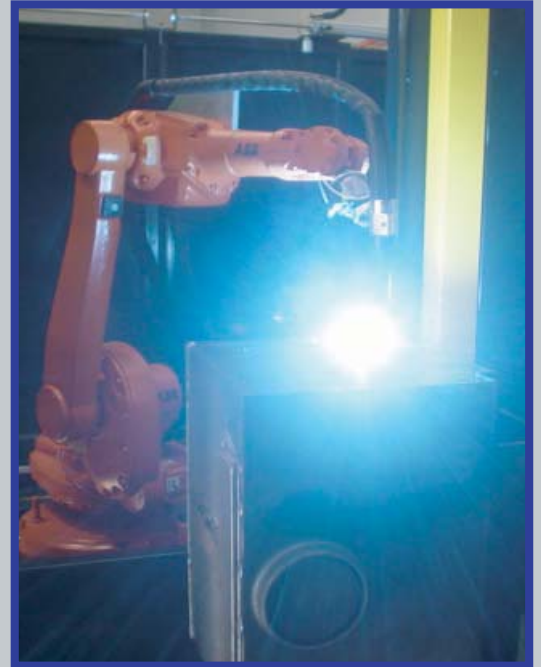

# E & E Manufacturing Company

Providing our customers with application specific solutions offering the best value and quality through innovations in design and process.

**DEFENSE – AUTOMOTIVE – COMMERCIAL – INDUSTRIAL**

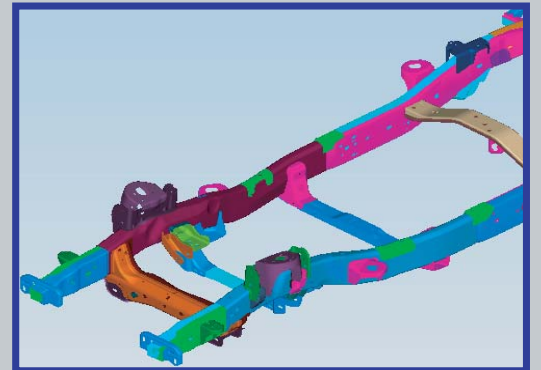

## Welding Engineering & Fabrication

- Certified in:
  - AWS 1.1 Steel
  - AWS 1.2 Aluminum
  - Armor steel welding
- In-house performance training for automatic, semi-automatic, and manual welding processes
- Robotic welding procedure development for ferrous and non-ferrous alloys
- Metallurgical evaluation lab focusing on:
  - Metallographic testing
  - Micro-hardness testing
  - Mechanical testing
  - Failure Analysis

## Engineered Solutions

- Expertise in Weight Reduction Engineering through design simplification for frames and structures
- Product Design team providing over 20,000 hours of engineering assistance to our customers annually. E&E has design input in more than 85% of parts produced.

## Manufacturing Capabilities

- Stamping presses ranging from 100 tons to 2500 tons
- Full service capabilities from design, tooling, short-run and long-run manufacturing, and assembly solutions.
- Integration through collaboration with strategic partners and strong engineering capability, E&E provides total system solutions.
